FOREST4EU Webinar

8 Oct 2025

Navigating Forestry and Agroforestry Resources on Europe's Climate Adaptation Portal

An official website of the European Union |

European Environment Agency

MAIN AIMS

- **Introduce** ClimateADAPT
- **Highlight** the Forestry landing page
 - Case Studies
 - Resource catalogue: projects
 - Adaptation Options
 - Quick showcase: Policy page
 - Tools (Links to information platforms and viewers)
 - Including the FISE platform (short extra presentation!)
- **Invite** you to contribute to ClimateADAPT!

EU Mission on Adaptation

The EU Mission on Adaptation to Climate Change portal provides relevant information and resources to European regional and local authorities to prepare and plan for climate resilience.

European Climate Impact and Preparedness Portal

This portal shows through interactive maps and charts how heatwaves, floods, droughts and wildfires are increasingly affecting Europe and show examples for preparedness.

European Climate and Health Observatory

The European Climate and Health Observatory provides access to a wide range of relevant publications, tools, websites and other resources related to climate change and health.

European Climate Risk Assessment

The European Climate Risk Assessment provides a comprehensive assessment of the major climate risks facing Europe today and in the future.

European
Climate and Health
Observatory

The European Climate and Health Observatory

The European Climate and Health Observatory provides access to a wide range of relevant publications, tools, websites and other resources related to climate change and health.

FOREST INFORMATION
SYSTEM FOR EUROPE

Forest Information System for Europe

FISE web portal will help us to improve the health and resilience of our forests, which play a vital role in protecting our biodiversity and in mitigating climate change.

The European Drought Observatory

The European Drought Observatory (EDO) contains drought-relevant information. These give an overview of the situation in the EU about imminent droughts.

The European Forest Fire Information System

The European Forest Fire Information System (EFFIS) supports the protection of forests against fires and provides the EU with harmonized information on forest fires

WHAT IS FISE?

Discover the source of data and
information on Europe's Forests

forest.eea.europa.eu

What's FISE?

The Forest Information System for Europe (FISE) is an entry point for data, information and knowledge on European forests – gathered or derived through key forest-related policy drivers.

FISE thematic pages

Country and EU
factsheets

Research corner

Europe's forests

This section presents the main aspects of Europe's forests, their status, their management and their uses.

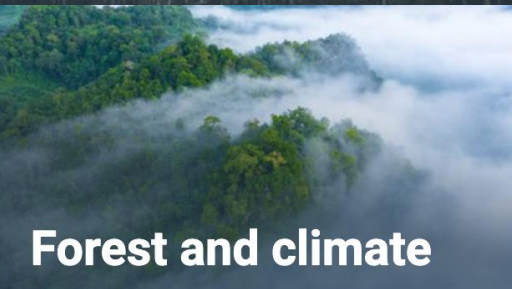

It is structured in 5 (soon to be 7!) priority themes for forest data and information.

Forest nature,
biodiversity and
ecosystems

Forest health

Forest and climate

Forests and society

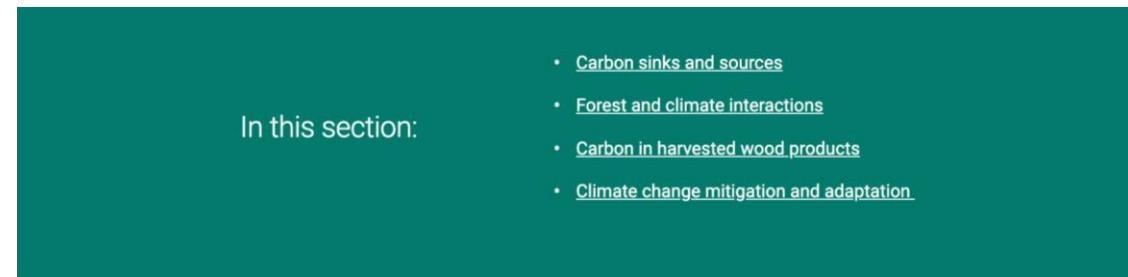

Forest management

What's in it?

- Main messages
- Key information
- Research highlights related to the topic
- Related policies, targets and resources

Coming up soon:

Related policies

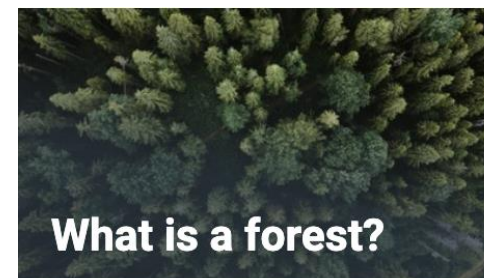

- The LULUCF regulation sets out the monitoring process for the EU's carbon footprint, as well as setting a net removal target of 310 million tonnes CO₂ equivalent (MtCO₂e) by 2030 for the EU's Land use, Land-use change and

Related targets

- The amended LULUCF Regulation sets a binding EU-wide net greenhouse gas removals target of -310 MtCO₂-eqyr⁻¹ for 2030 and allocates national contributions. See assessment [here](#).

Related resources

- Future hazards affecting Europe. A story map. Relevant aspects for forests are droughts, floods and fires
- National emissions reported to the UNFCCC

What is a forest?

How you can support Climate-ADAPT

- Contribute to 'news' and 'events', and the quarterly Climate-ADAPT Newsletter (Currently 6000+ subscribers)
- Share your information through the Climate-ADAPT database
- Guide your stakeholders towards Climate-ADAPT via web links
- Address your stakeholders jointly with us in your national level events

Or mail to :
climate.adapt@eea.europa.eu

Wanted! Case studies on...

WANTED

Climate-ADAPT stakeholders are welcome to share information about their own experiences that meet case study criteria by contacting climate.adapt@eea.europa.eu.

- **Good forestry practices which reduce vulnerability & enhance resilience and adaptive capacity**
...and deliver also better biodiversity and other co-benefits ('no regret measures')
- **Good practices of forest disaster preparedness, disaster response, and post-disaster recovery**
- **Good risk management and prevention practices**
e.g. application of risk assessment tools, early warning systems, disturbance monitoring and contingency plans, financial risk management tools
